### Refresh Rule - Tables in Sets Parameter Form

This page is generated by the PL/SQL Web ToolKit on February 03, 2014 11:09.

Institution:  Request Group:

Special Flag:

Application:   
 Table Name:   
 Frequency:   
 Pattern:

Reset Submit Request

RPTP will default in the Instance field.

If you're interested in the refresh schedule of a specific table, enter the full table name in the Table Name field. To search for table names that share certain criteria, use the wildcard % for your search.

For example, you could type PHRHIST in the Table Name field to find the normal refresh schedule of that specific table. Or you could enter P% if you want to see the refresh status of all of the tables that begin with P (payroll-related tables).

You can also use the Application field if you want to see the refresh schedule for sets of tables in an application area (Finance, HR, Student). To see all of the payroll-related tables, you can enter Payroll% in the field. To view a list of all of the position-related tables, you can enter HR-Posn Ctl% or HR-Posn Ctl% in the field.

11. After entering your parameters (search criteria), select Submit Request.
12. Your results will be displayed in a separate window or tab in your browser. Only a certain number of results can be displayed on the results page. If you see a Fetch More Records button at the end of the page, then more query results are available. Selecting the button will redisplay the page with the next batch of results.

In the sample below, you can see the detailed schedule data for each of the position-related tables (by using HR – Posn Ctl in the Application field). The most pertinent fields to reference are: Table, Application, Frequency, Pattern, Last Refreshed, and Next Refresh.

INST.	TABLE	SET #	SET ID	APPL	FREQUENCY	PATTERN	TABLE COMMENTS	LAST REFRESHED	NEXT REFRESH	
RP	0303	XBDP0303	HR-Posn Ctl	Daily	xMTWRxS	S/S-F	changed from ? to fast refresh	01-FEB-14	03-FEB-14

**NOTE:** Some tables are shared/used by more than one application area, but the tables are housed under a particular application (e.g. SPRIDEMGOREMALT). To view tables such as SPRIDEN or SPERS, you would

need to enter Student in the Application field. To view tables such as GOREMAL or GXVDIRD, you would need to enter General in the Application field.

### Exiting QMenu

13. To exit QMenu and leave your browser open, select the Reconnect button or select your browser's reload/refresh button. You can also close the tabs in your browser (the QMenu site doesn't have a "logout" button or link).

If you are using a shared computer, be sure to close all of the browser windows/tabs, and clear the browser's history (cache).
